Rochester is the earliest, yellow freestone known

ROCHESTER PEACH

At Last a Large Yellow Freestone Peach that Ripens in August—When You Are Peach Hungry

Another outstanding characteristic of this wonderful Peach is that it frequently bears the first season planted.

Always the second year.

Breaks records the third year.

Trees planted in Spring of 1922 bore 150 to 200 perfect peaches past Summer.

Every Year is a Rochester Year—It's All Peach

ROCHESTER is a large yellow and red freestone, flesh yellow, very highly flavored. To eat fresh out of hand or canned, it cannot be equalled as a table delicacy. Stone very small and will ship as good as an Elberta. The peach comes into ripening when there is no other yellow and red freestone with quality on the market, hence it commands the very highest market price, ripening as it does, the middle of August. The tree is a strong upright grower, hardy as an oak, has stood 16 degrees below zero and produced a good crop while Elberta and Crawford, under the same conditions in the same orchard, produced no blossoms, consequently no fruit.

The following letter received in 1924 when the trees shipped to Mr. Mills had been planted but two years.

"While eating some luscious peaches from the trees I purchased from you, I thought possibly you might be interested in these facts. The trees were shipped in April, 1922. From one of the trees this year we have taken 37 fine large peaches. This tree stands about 11 feet high, the spread of the branches being fully 6 ft. and had it not been for late frosts we would have had easily a peck or more from each tree. We think this is a most unusual occurrence and believe it speaks unusually well for the quality of trees sent out by your nursery. I might add that the quality of the fruit is wonderfully fine."

FRED MILLS, Grove City, Pa.

PRICES—Medium Size, \$1.00 each; \$10.00 per 12

Delicious Washington Asparagus

**Extra Large and Heavy 3 Year Old Roots for Quick Cutting
Everyone, Everywhere, Should Have Their Own Asparagus Bed**

Easy To Grow As 2 + 2

FOR success, the soil in which Asparagus roots are planted should be well drained, and while it does not need to be necessarily rich, always remember the richer the better. Set the roots in trenches, six to ten inches deep, and cover with only a few inches of soil; as the plant grows the soil can be levelled in. A heavy mulch of coarse manure should be given in the late fall. Be sure and cut the tips off before the seeds begin to ripen.

The New Rust Resisting Variety Developed by The United States Department of Agriculture

Washington Asparagus is the first result of a blister proof campaign for the eradication of asparagus rust and is as far as possible an extremely resistant, vigorous, and high yielding strain of giant asparagus. The plants represented in Pedigreed of the last three generations are the best found in a ten-year search among millions of plants tested.

By best we mean the ones that have produced offspring uniform—rust resistant—high yielding—large size—unbranched shoots—with good top buds of rapid growth which indicates tenderness.

*For quick results plant these
extra heavy roots 3 years old*

**Prices: \$7.00 per 100, \$30.00
per 500, \$55.00 per 1000**

Remember—you risk nothing. If upon receipt of shipment you find that the plants are not the finest and largest 3 year asparagus roots you have ever seen, wrap them up and return to us, and we will refund your money without question, quibble or controversy.

We Also Offer Pedigreed Washington Asparagus In 2 Year Old Plants

For those who can wait longer for results, these fine 2-year old plants should make sufficient growth for cutting the second year.

**Prices: 2-year old plants,
\$3.50 per 100, \$30.00
per 1000**

Why pay fancy prices for asparagus—Grow your own.

Improved Thornless Dewberries

Large, jet black, luscious fruit

LARGER, finer and better flavored than blackberries and the real dewberry flavor. Absolutely thornless. The fruit is easy to gather, neither gloves nor courage needed. Fruit is jet black, of large size, sweet and borne profusely. Should be planted in every home garden and is very profitable grown for market. Set plants 5 ft. apart in rows 5 ft. apart, or 1742 plants to the acre.

CULTURE DIRECTIONS—

Use short, stout stakes, driven at the end of each row of canes, with a cross-piece 18 inches long nailed to each stake, 2½ to 3 ft. from the ground. On the top, near each end of these cross-pieces, drive a stout nail, slanting toward the stake, upon which to catch a wire. Two lines of No. 14 galvanized wire, one on each side of the row, are fastened to one end of the stakes and run on the ground between the rows to the other end stake. These wires are now drawn as taut as possible and securely fastened to the other end of the row. The

wires are now raised and caught in the nails, thus holding all the canes closely together in the row.

Price, Strong plants \$3.00 per 12, \$20.00 per 100.

York State's Best Strawberries

*New York State is noted
for its fine strawberries*

**We Offer You the Best
Varieties**

JUMBO is just what its name implies — a mammoth plant and a whale of a berry. 64 quarts picked Nov. 7, 1924 sold at 50c per quart. Jumbo is not classed as an everbearer but an enormously productive variety of the regular season. We regard it as the best strawberry on the market today.

SUNSET—Plant extremely robust, will grow on all soils and delights in heavy clay. The blossoms come late and resist frost. Berries, deep red, good fresh or cooked. Very productive.

TABLE QUEEN—A high class berry for any purpose. For dessert it charms and satisfies the palate; it is delicious and appetizing for the sick room; adds a delicate relish to meats, cereals, and white bread; unrivalled as a short cake berry. It is the one berry for those with weak digestion. Bright red, medium to large, vigorous vines and production.

50 of each variety of these real quality and high yielding plants **50 Jumbo—50 Sunset, 50 Table Queen** for \$5.00. Plant this spring and pick berries in June.

Just add cream and a very little sugar.

Special Prices on Large Specimen Fruit Trees

APPLES—PEARS—PLUMS—CHERRIES

Trees 4 Years Old—Seven to Nine Feet Tall

An excellent specimen of super-size 4 year old apple. Such a tree has a good root system to start with. Such trees are worth double the price asked.

steady it so the wind and storm will not move it. The tree is a wonder, so large and beautiful. It was received on October 12 at 5 P.M. Also the Yellow Gage Plum, something most beautiful, and very large in size and the three apple trees, all planted on arrival and braced for protection and a straw mulch will be placed around them a little later on.

Some time ago I purchased two quince, a cherry and a Hyslop Crab apple tree from you. Let me thank you over and over as the trees are loaded with fruit each year, no let up at all. The Crab apple is a beauty to behold with their red cheeks and its limbs loaded. I stand sometimes and think of you and I am ever so thankful that I bought from your nurseries. My asparagus bed is a wonderful producer—large stalks and plenty of them.

Let me thank you again and will recommend you whenever possible. Yours truly,
ERNEST SPENCER

Beautifully Rooted—

Handsomely Branched—

Splendidly Balanced

NEVER before have we sold super-size fruit trees for so little money. Our big stock is the reason. We must move them. Hence, these prices:

**\$2.00 Each; \$18.50 per 10;
\$150.00 per 100.**

These prices save you money worth saving.

Trees You Will Feel Proud to Own— Proud too, to Show Your Friends

Every day in the year someone, somewhere, brimming over with enthusiasm writes telling us of their wonderful satisfaction with our trees.

We reprint below Mr. Ernest Spencer's letter received Dec. 7th.

ERNEST SPENCER

436 South 7th Avenue
Mount Vernon, N. Y.

Dec. 5, 1925

Messrs. Glen Bros.,
Rochester, N. Y.

Gentlemen:

The Lambert Cherry Tree was planted in 15 minutes after I received it and 4 guy wires placed to

Just a few of the super-size 4 year old apple, large, beautiful trees; straight trunks, well shaped, branched tops. Note how they tower over the small evergreens in the foreground which average about 3 feet in height.

Varieties of Super-Size Fruit Trees

APPLES

Red Astrachan: Large; deep crimson; juicy. August.

Yellow Transparent: Medium size; pale yellow; good. July and August.

Fameuse (Snow): Medium size; bright red; flesh white. Juicy. October.

Gravenstein: Large; yellow overlaid with red; juicy, productive. September to November.

Twenty-Ounce (Cayuga Red Streak): Very large, yellow splashed with red. October.

Baldwin: Large; deep red; crisp and juicy; vigorous grower; heavy bearer. November to March.

Delicious: Ranks high as a variety for commercial or home orchards. Large; brilliant dark red; flesh fine-grained, crisp, juicy. November to February.

McIntosh: Large; deep red; flesh crisp, tender, juicy. October to December.

Northern Spy: Large; bright red; spread with delicate bloom; flesh tender, rich, delicious. November to March.

Rhode Island Greening: Large; greenish yellow; flesh tender. December to April.

Wealthy: Medium to large; deep red, juicy. October to January.

PEARS

Bartlett: Large; waxen yellow with red blush; buttery, very juicy and high-flavored.

Anjou (Beurre d'Anjou): Large, handsome; greenish yellow, with a dull red cheek on the exposed side, flesh fine-grained.

PEARS

Clapp's Favorite: Very large; yellowish; green to full yellow, rich.

Angouleme: Large; greenish yellow, splashed with russet; a good bearer.

Seckel: Small, but handsome and delicious; very juicy.

Kieffer: Large, very handsome; rich yellow, tinged with red, excellent when canned.

CHERRIES

Dikeman: Large; black.

Governor Wood: Large, light yellow, shaded and mottled with light red.

Lambert: Very large; dark purplish red, turning to almost jet-black when full ripe.

Napoleon: Very large; pale yellow, spotted and shaded with deep red.

Black Tartarian: Very large; black; tender.

PLUMS

Bradshaw: Very large; dark violet-red.

German Prune: Large, oval; dark purple.

Yellow Gage (Prince's Yellow Gage): Large, oval; golden yellow, slightly clouded; flesh deep yellow, rich, sugary, melting.

Lombard: Medium size; violet-red.

Burbank: Large, nearly globular; clear cherry-red, sweet, meaty and quite firm.

October Purple: Large, round; purple.

Red June: Professor Bailey says, "By all odds the best Japanese Plum." Large; brilliant red.

Big, Juicy Grapes for Delicious Grape Juice

Nothing quite so sure to grow, nothing quite so sure to bear, nothing quite so sure to please every taste. Nothing unusual for these large plants to fruit first year planted. Planted this Spring should produce fruit first season.

Luscious Grapes

Extra large, extra old, extra fine 3-year old grape vines (super size).

Best Varieties for Pressing the Juice

CONCORD (black). Large and handsome, very hardy, productive and reliable; succeeds well over a great extent of country, and is one of the most popular market grapes.

IVES (black). Bunch extremely large, shouldered compact, handsome; Berry—large tender, juicy, sprightly vinous, rich, sweet without pulp. Vine is vigorous, healthy, hardy.

MOORE. Bunches larger; berries large, round, black with a heavy bloom; pulp of good quality; vine notably resistant to disease, very hardy, withstanding temperatures of 20° below zero without injury.

Best Varieties for Eating Fresh

CAMPBELL'S EARLY (black). Clusters large and handsome; berries large, nearly round, black, with light purple bloom; flesh rather firm, but tender; quality rich, sweet, slightly vinous; a strong and vigorous grower.

BRIGHTON (red). Flesh rich, sweet, and of the best quality, equal if not superior to Delaware; ripens early. Productive and vigorous.

McPIKE. Bunches large and compact, like its parent, Worden; berries very large, black; pulp tender and very juicy. Healthy and hardy.

GREEN MOUNTAIN. Bunches long, compact and shouldered; berries oval, greenish white; pulp tender, juicy, very sweet and rich; vine hardy, vigorous, healthy, and very productive. Ripens three weeks earlier than Concord.

NIAGARA (white). Bunch medium to large, compact, occasionally shouldered; berry large, roundish, uniform; skin thin but tough, pale green, changing to pale yellow, with a thin whitish bloom; flesh slightly pulpy, tender, sweet; ripens with the Concord.

Prices for these Super-size Super-age Plants \$1.00 each; \$10 per doz.; \$75.00 per 100

Second to Blueberry pie, Rhubarb, the pie of hearts desire.

Burbank Giant Crimson Rhubarb

A Luther Burbank Creation

EXTRA large, of fine bloom, and crimson clear through, this new variety of appetizing "pie-plant" should be in every garden, and will be when known. Plant a few this spring along beside that you now have growing in your garden and note the difference. **Burbank Giant Crimson** is superior in size and quality to any variety we have ever tested. It is an early variety, without being in the least tough or stringy, with a mild sub-acid flavor. Largest and best of all for market or home use.

Plant this Spring in good garden soil, manure well, and have delicious pie and sauce in 30 days.

PRICE—For strong roots, 2 year old, 50c each, \$3.00 per dozen.

Honeysweet Black Raspberry

The sensation of the fruit world. Do not fail to include in your order for our Dependable Trees and Plants a few at least of the most delicious fruit you have ever tasted.

the Honeysweet. The berries are just about the most delicious fruit you have ever tasted. Ripens in July—sweet and delicious—unlike any other Black Raspberry.

The Honeysweet is extremely hardy, passing through the severe fruit tree killing winter of 1919-1920 without injury to a single twig on any plant in a four-acre patch. Bears every year—has never been a slacker.

Large Size—Glossy Black—Delicious. The worlds' greatest Black Raspberry.

The many clusters of big Black Raspberries literally cover the bushes. Twelve of our vigorous nursery grown plants will produce many quarts of fruit, next summer when you are hungry for berries. Twelve or more plants will fit into your garden nicely—no garden should be without Honeysweet.

As a dessert berry, in pies, as a canned sauce, as a jam, you never tasted anything like it before or since. It has been called "The most delicious Black Raspberry."

Price: \$2.00 per 6; \$3.00 per 12; \$12.00 per 50; \$20.00 per 100.

Plenty of fruit from plants like these.

BLUEBERRY PIE—Hm!

“The Pie of Big Mouthfuls, Crushed Lusciously”

And Right From Blueberries In Your Own Garden

CAN you imagine anything more satisfactory than having delicious blueberries growing in your own garden? No doubt you have enjoyed these wonderful fruits on the hotel or restaurant menu, served with cream for breakfast, or as blueberry pie or dumplings for luncheon or dinner. They are a fruit that satisfies for three meals a day and one dozen plants are quite sufficient to supply the average family with blueberries. They can be used freely for making breakfast muffins or preserves.

One quart of fruit sufficient for one big juicy pie.

Hardy and Ornamental

Nor should the ornamental value of Blueberries be overlooked. Prof. Bailey says: “In the Spring the young shoots and leaves are a rich bronzy red, later the clusters of long, white flowers, followed by clusters of dainty pink buds. In winter the red bark creates a charming tracing of red twigs against the snow. Rarely does a plant or shrub combine such exquisite beauty with a fruit, than which there is none more delicious. It is one of the most valuable species both for fruit and as an ornamental shrub. It thrives in the garden and is readily susceptible to improvement by cultivation.”

Try a Dozen of our Large Bushy, Collected Plants, this Spring. Fruiting Season Early July 'till Late Summer.

Strong, Bushy Plants, 2 to 3 feet.

Price \$1.50 each, \$15.00 per dozen, \$100.00 per 100.

Cultural Directions

Blueberries require an acid soil to produce the best results. This is prevalent in many sections of the country. Where your soil is not acid, we suggest the following method to get the most from your plants. Choose a well-drained location, easily supplied by water during the dry summer months. Blueberries do best with full sun, although they will grow and produce fruit in partial shade. In order to get the proper acid condition to your soil, mix partly rotted leaves with the soil of your garden. A heavy mulch each fall of partly rotted leaves will maintain the acidity of the soil. Do not remove this mulch, but let it remain throughout the year. Another easy method to obtain acidity to the soil is to

obtain partly rotted sawdust or wood chips. This makes excellent material and produces an acid condition very beneficial to the plants. Acid fertilizers can be used if the above two methods are not possible. The Department of Agriculture recommends as the best chemical fertilizer aluminum sulphate, which is an effective and inexpensive method of changing neutral soil to acid, half a pound per plant may be advantageously applied. Never use manure or compost near a blueberry plant. No pruning is necessary except as a branch may become damaged or stop bearing. Water your plants well the first year, soaking the ground two or three feet away from the roots.

One of our Dwarf Apples 2 years after transplanting.

New Champagne Grape

A sterling variety of greatest merit. Color a beautiful copper red, berries very large—immense bearer. Champagne is hardy, never having been known to winter kill, always producing an immense crop of fruit even during seasons when many other varieties fail to fruit. Champagne is a very strong grower, 15 to 20 feet or more a season being common. It is one of the handsomest and most attractive grapes we have ever seen. The flesh is tender, extremely juicy and sweet with a rich aromatic flavor. Its keeping qualities are superior. A *truly wonderful grape*, fine for eating fresh, grape juice or wine. Order now for Spring planting as stock is limited

PRICES—No. 1—2 yr. extra strong \$1.50 each; \$15 per 12; \$100 per 100.

No. 2—1 yr. extra strong \$1.00 each; \$10 per 12; \$75 per 100.

6 Best Dwarf Apples

An All Season Dwarf Apple Collection

Come into bearing immediately, producing same quality and size fruit as standard trees. Excellent for planting where area is limited—may be planted as close as 8 feet apart. Trees reach height of about 15 feet at maturity. **One each of the following six varieties for \$6.00.**

RED ASTRACHAN. Large; deep crimson; juicy, rich, acid; productive. August.

YELLOW TRANSPARENT. Medium size; pale yellow; pleasantly acid, good. July and August.

BALDWIN. Large; deep red; crisp and juicy; vigorous grower; heavy bearer. November to March.

DELICIOUS. A relatively new apple, ranking high as a variety for commercial or home orchards. Large; brilliant dark red, flesh fine-grained, crisp, melting, juicy, with a delightful aroma; splendid keeper and shipper; tree bears heavy crop, annually, a profitable sort to grow. November to February.

NORTHERN SPY. Large; bright red spread with delicate bloom; flesh tender, rich, delicious; bears well. November to March.

WEALTHY. Medium to large; deep red, juicy. October to January.

Hardy English Walnut Trees for Spring Planting

English Walnut. Every English Walnut tree we sell was started from seed produced from a bearing tree growing in this locality—every tree is guaranteed to be a “Glenwood Grown” tree, hence our trees are very hardy. Such trees are the only safe trees to plant in Northern latitudes. Neither our young nursery trees nor our six or seven year old bearing trees have ever shown the slightest evidence of injury from winter temperatures of eighteen to twenty degrees below zero.

Plant a few of these trees this spring. In your available space a few hardy, vigorous English Walnut trees will prove valuable for decoration, shade, and allow a household supply. The smooth bark is light gray in color, and the leaves are long, deep green and waxy. The English Walnut is a rapid grower.

AVERY, KRETZMER, OLCOTT, INC.

Scales, Engines, Specialties
30 High Street
Hartford, Conn.

March 11th, 1925.

Glen Brothers,
Rochester, N. Y.

Gentlemen:—

Will you please send me a copy of your latest catalogue?

It might interest you to know that some nine years ago I purchased several English Walnut trees from you, these trees have made a most satisfactory growth, and have borne a few nuts for the last three or four years. Last year four of them bore fruit of very good size and quality. One tree in particular bore some five or six quarts of very good nuts.

Have been quite pleased with the results from these trees.

Very truly yours,

(Signed) IRVING J. AVERY
Wolcott Hill, Wethersfield, Conn.

8 Year Old Bearing English Walnut at Glenwood Nursery

Erskine Park Everbearing Raspberry

*The Busiest Plants You Ever Saw
They Work All The Time*

Its delicious fruit may be picked every day from June until frost. Think of it! Large, red, luscious raspberries on your table every day during four months of the year and from your own garden. Discovered on the beautiful estate, "Erskine Park" owned by Mr. George Westinghouse of Lee, Mass., in the Berkshire Hills, a locality where winter temperature is occasionally forty degrees below zero, proves its hardiness beyond question.

Mr. Thos. E. Covington, St. Paul, Minn., writes us as follows:

"It may be of some interest to you to know that the Erskine Park Raspberry plants ordered from you in April, 1920, withstood one of the worst winters that we have had for years. We had very little snow and an alternating freezing and thawing February and March, and many of our local shrubs and plants succumbed. At the present time, there is an elegant display of young Erskine Park Everbearing Raspberry plants shooting up.

I planted these in sandy loam, and on the opposite side of a dead furrow, I planted at the same time 2 LaFrance Everbearing Raspberries which showed equal development during the summer and fall, but this spring every one is dead, not a live root to be found."

As late as November 20th, we have cut branches from plants growing in the nursery, with blossoms, green fruit and ripe fruit upon them.

The Erskine Park is destined to be the "DESSERT BERRY OF THE NATION." We predict that it will be planted in every garden in America. Order your plants now for Spring planting. We are headquarters for Erskine Park Everbearing Raspberry Plants, and offer for shipment this season HEAVY 2 YR. FRUITING PLANTS, ONCE TRANSPLANTED, AT \$3 PER DOZEN, \$20 PER HUNDRED, \$150 PER THOUSAND.

the Following
List for \$5.00**

Will Bloom First Season Planted

Butterfly Bush: (Summer Lilac). The name Butterfly Bush was applied to it because it seems to attract the large, gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. A single plant the first season will throw out as many as 50 flower spikes.

Golden Barked Dogwood: Conspicuous bright yellow bark, handsome green foliage and immense clusters of large white waxy berries.

Forsythia: (Golden Bell). Rich golden yellow flowers are borne in great profusion along the branches before the leaves appear.

Tartarian Upright Honeysuckle: Bears a profusion of bright pink flowers in the spring, followed by orange scarlet berries.

Golden Spirea: A variety of golden yellow foliage and double white flowers in June. Effective in shrubbery or for planting along banks or as screens.

Snowberry: Bushy shrubs 3 to 5 ft. with slender spreading branches, loose racemes of pinkish flowers in summer are followed by waxy snow-white berries.

Hydrangea Hortensis: An upright shrub, usually 4 to 8 feet tall, with bright green leaves. Flowers creamy white, generally with a few sterile rays, borne in numerous flat-topped clusters in early summer. Hardy and attractive.

Deutzia Crenata: Flowers double white, tinged with rose. One of the most desirable flowering shrubs in cultivation.

Yucca: (Adam's Needle). A handsome evergreen plant with swordlike foliage, with spikes of fragrant drooping bell-shaped creamy white flowers during June and July, making a tropical effect.

Sweet Syringa: Popular ornamental deciduous shrub that will add attractiveness and fragrance to the home gardens.

Deutzia Pride of Rochester: A shrub that delights the eye with its large double white flowers which are tinged with pink in the bud.

White Tartarian Honeysuckle: A beautiful white variety with a profusion of bright red berries ripening in summer and persisting until Autumn.

One each of these 12 Flowering Shrubs only \$5.00. Order now.

A splendid arrangement for porch and foundation plantings.

Beautify the Home

Six New and Rare Lilacs

From Famous Highland Park
SHOWY—HARDY—EASY TO GROW

WE offer the following collections of new French Hybrids, believing that we are the only nurserymen in the United States growing these varieties. We were assisted in the selection of them by Mr. John Dunbar, famous as the Assistant Superintendent of Highland Park, Rochester, N.Y. Highland Park contains the largest collection of Hybrid lilacs in the United States. One of the chief attractions in Rochester is the Highland Park lilac collection. Nearly 200,000 people visited Highland Park last Spring when these lilacs were in bloom. We offer this selection of six new and rare varieties composed of one each of the varieties described to a limited number of customers and when our present stock is exhausted we shall have no more of these varieties to offer until next Fall. Order now before present stock is exhausted.

ADELAIDE DUNBAR (Mrs. John Dunbar)—Semi-double, deep maroon in bud, violet-red when fully opened. The clusters are bold and handsome and we regard it as one of the best of our newer varieties.

GENERAL PERSHING—Flower semi-double, buds deep lilac, bluish-lavender with a tinge of very delicate azure-lilac when open. This is a remarkably free bloomer with large clusters.

HIRAM H. EDGERTON (Named for one of Rochester's former Mayors).—Large and stately panicles of single flowers, deep lavender in bud—creamy lavender-lilac when fully opened with a faint tinge of porcelain-blue center. One of the most beautiful lilacs, both in bud and when fully opened, we have ever seen.

PRESIDENT HARDING—Flower single, buds deep crimson, reddish-lilac when fully opened. Enormous flowers 7 to 8 inches long. Branching habit low and compact.

WM. C. BARRY (Named for one of the founders of the Ellwanger-Barry Nursery Company)—Broad, large panicles—buds reddish lilac. Silvery-lavender or pearly-lavender when fully opened. Of great value for cut flowers. A variety that is bound to be in great demand when known.

PRINCESS MARIE—A variety of extraordinary merit. The clusters are particularly handsome, being a soft, creamy lilac color. This collection would not be complete without Princess Marie.

OUR PLANTS ARE STRONG AND VIGOROUS AND SHOULD BLOOM THE FIRST SEASON TRANSPLANTED
SPECIAL PRICE FOR THIS COLLECTION \$10.00—SINGLE PLANTS \$2.00 EACH

Six Beautiful Hardy Azaleas

For outdoor planting. All colors of the rainbow. Deep Pink, Shell Pink, White, Orange, and Canary.

A wonderful collection for lovers of these exquisite shrubs.

The plants we offer are blooming plants, shipped to you with ball of earth burlapped to roots and will transplant easily—Plant this Spring, mulch with plenty of leaves and they should bloom this summer. We offer the following six plants 12-18 in. high for \$10.00.

A GREAT BUY

Azalea Arborescens: Flowers fragrant white—foliage brilliant red in autumn.

Azalea Canescens: Beautiful pink flowers in spring—a rare and very fine species.

Azalea Lutea: (*Flame Colored Azalea.*) Gorgeous flame colored azalea varying from orange to canary—a free bloomer.

Azalea Nudiflora: Very handsome free flowering shrub, deep pink; early and profuse—very showy.

Azalea Vaseyi: Delightful shell pink, blooms in early spring—wonderful colored foliage in autumn.

Azalea Viscosa: A late white blooming species—extra fine for borders.

One Million Irises

We couldn't retail 'em all at regular prices in five years but we can move them quickly by giving them away. This is practically what we are doing when we offer them to our customers at the following ridiculously low prices:

10 Strong Clumps, only \$ 1.00
100 Strong Clumps, only 9.00
1000 Strong Clumps, only 75.00

Each order will contain an assortment of varieties and colors

Order generously—plant them in shrub borders, along the walks and driveways, on the banks of streams, small lakes and ponds—plant them anywhere and everywhere. One dollar, ten dollars, one hundred dollars spent for these Irises will give you heaps of real pleasure and satisfaction.

Perennials are the thing

Make Your Garden A Riot of Color From June Until Frost

OUR selection of 25 best perennials for Spring planting. One plant of each variety—25 plants in all—only \$5.00. For choice flowers this summer plant this Spring.

Following are the 25:

Anchusa: Tall spikes of beautiful blue flowers flowering all summer. 5-6 ft.

Anemone Queen Charlotte: Large semi-double silvery pink. Blooms October. 1 ft.

Anemone Whirlwind: Very large double white. Blooms October. 1 ft.

Aquilegia Canadensis: Scarlet and yellow. Blooms April to June. 2 ft.

Campanula Media: (*Canterbury Bells*). Large cup shaped flowers, rose. Blooms June to July. 2-3 ft.

Chrysanthemum Maximum: (*Shasta Daisy*). Large snow-white flowers, blooming all summer. 3-4 ft.

Chrysanthemum Hardy Pompom: Bronze. Blooms September. 3-4 ft.

Coreopsis Lanceolata: Rich golden yellow flowers nearly all summer. 2 ft.

Helenium Riverton Gem: Old gold, changes to red. Very beautiful plant. Blooms August to October. 2 ft.

Heliopsis Scabra: Golden yellow Zinnia-like flowers. Useful for cutting. Blooms August. 2 ft.

Hemerocilis Flava: (*Lemon Day Lily*). Fragrant golden yellow flowers in large clusters. Blooms in June and July. 2 ft.

Liatis: (*Kansas Gay Feather*). Flowers purple, in dense-like spikes. 4-5 ft. high Thick grass-like foliage. Blooms July.

Lupinus: Long spikes of pea-shaped flowers on long stems. Attractive colors. Blooms May. 3 ft.

Platycodon: (*Bellflower*). Large bell-shaped flowers. Blooms August to September. 2 ft.

Physalis: (*Chinese Lantern Plant*). Very

large. Orange red fruits. Suitable for winter decorations. 2 ft.

Oriental Poppy: The showiest of the poppies with great silky scarlet and red flowers on long stems. Blooms in May. 2 to 3 ft.

Pyrethrum Roseum: Finely cut foliage and daisy-like flowers on long stems. Blooms June. 1½ ft.

Salvia Azurea: (*Meadow sage*). Pretty spikes of tall blue flowers in August and September. Profuse bloomer. 3 ft.

Funkia: (*Plaintain Day Lily*). Handsome broad foliage and fragrant lily-like flowers in late summer. 1 ft.

Digitalis (Fox-Glove). Stately plants bearing long spikes of tubular flowers in July and August. 2 to 3 ft.

Delphinium Belladonna: Clear turquoise blue flowers. Blooms July to August. 4-5 ft.

Delphinium Chinese Alba: A dwarf species producing spikes of white flowers. Blooms July to August. 2 ft.

Dianthus Barbatus: (*Sweet William*). An old time favorite that is hardy, beautiful and free flowering. In various tints and shades. Blooms all summer. 1½ ft.

Gaillardia Grandiflora: A fine large flower, brown center surrounded with crimson rings and yellow border. Blooms all summer. 2-3 ft.

Gypsophila Paniculata: (*Baby's Breath*). Mist-like sprays of minute white flowers. Fine for bouquets. Blooms continuously. 2 ft.

One Each of These 25 Best Perennial Plants only \$5.00

Blood Leaf Peach—Brilliant Red Bark, Dark Red Foliage

*Handsome pink blossoms in profusion in early Spring
Plant as an ornamental, also for its fine fruit*

Small trees with blood-red foliage make a charming contrast planted in shrubberies.

OF this remarkable variety "PEACHES OF NEW YORK" by Professor U. P. Hedrick, Vice Director and Horticulturist of the New York State Agricultural Experiment Station says "Blood leaf is a handsome ornamental, its beet-red leaves in early Spring and its pink blossoms borne in great profusion entitle it to esteem for both foliage and flowers. It is worth growing as well as for its fruits." Plant it on the lawn, in your shrub border or in the garden.

Legend

Several stories are told of the origin of this peach. One is that on the battlefield of Fort Donelson, Kentucky, a southern general, fatally wounded, sucked the juice of the peach and threw the stone into the little pool of blood which flowed from his side. From this pit in its bloody seed-bed sprang the tree with its blood-red leaves.

Prices—Strong Trees, 4-5 feet, \$1.50 each; \$15.00 per 12.

6 GREAT PEONIES FOR \$4.00

No longer is this beautiful flower, equaling the Rose in brilliant color and perfection of bloom, neglected. It has risen in public demand until it now has first place, and deservedly so.

Edulis Superba: Bright mauve-pink; large, rather flat, crown type; strong, upright grower, free bloomer; fragrant; early.

Queen Victoria: Milk-white guards tinted flesh; the center creamy-white with crimson spots; bomb type; free blooming; fragrant; mid-season.

Rubens: Very dark crimson; large, semi-double type; fragrant; early. Extra fine variety.

Canari: Yellowish; globular bomb type; fragrant; late.

President Roosevelt: Semi-Rose type; color, deep rich, brilliant red; mid-season, fine.

Festiva Maxima: Pure white, flecked with carmine; very large rose type; free-flowering; fragrant; medium early.

Good strong divisions with 3 to 5 eyes. This collection of 6 all different as described \$4.00.

We are always glad to open charge accounts with responsible people.

Peonies are splendid for cut flowers.

TEN UNUSUAL TEA ROSES

Bloom All Summer The First Season Planted

THIS magnificent assortment, including one plant of Los Angeles for \$10.00. All strong two year field grown plants. This is unquestionably the finest assortment of Roses we have ever offered or have ever seen offered for \$10.00. Order to-day and you will have a rose garden that will be a delight for years to come

Roses are red, Violets are blue, plant these roses and they will bloom for you.

intensely fragrant flowers which retain their color until the last petals drop. A moderately vigorous grower.

MME. EDOUARD HERRIOT: (The Daily Mail Rose) Buds lovely coral-red, shaded with yellow; flowers medium-sized, semi-double, of the same shade as the buds, tinted with yellow and bright rosy scarlet. Vigorous grower and hardy.

OPHELIA: The color is one so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades—salmon-flesh, shaded with rose. Buds of unusual attractiveness, opening full and double. Habit excellent, growth strong, produces flowers on long stems, well up above the foliage, and in great profusion all summer. Hardy in almost all localities. Grand for forcing or out-doors.

RADIANCE: H.T. This stands supreme as the best pink Rose in cultivation because of its vigorous constitution. The buds are elegant in form, and the large flowers are a good cup-shape, light silvery flesh to sal-

mon-pink, with opaline tints. A constant bloomer and delightfully fragrant.

SUNBURST: H.T. Nice long buds, usually borne singly on long, stout stems; flowers large, full, of fine elongated cupped form, a superb cadmium-yellow passing to yellow-orange in the center. An invaluable Rose for bedding, garden, or forcing.

LADY HILLINGTON: Flower deep-apricot-yellow medium size, long pointed bud, growth vigorous, very free. Distinct and excellent.

LAURENT CARLE: Flower brilliant crimson carmine, very large, full, long bud opening well, generally borne singly on long stems. Sweet scented. Growth vigorous, very free flowering, erect.

MAMAN COCHET: T. Fine, long, pointed buds; flowers rose, shaded with carmine and salmon outer petals splashed with bright rose; very large and full. Extremely vigorous and floriferous.

GRUSS AN TEPLITZ (Crimson Hermosa) H.T.

The clusters of fine long buds and magnificent bright crimson flowers, with fiery red shading, make a brilliant show all summer and its beauty is still further enhanced by the lovely green foliage, which in the young growth is a dark, rich bronze. It is very fragrant, free-blooming, hardy and vigorous.

KILLARNEY. H.T. The buds are very long and pointed; the flowers are a lovely flesh, shaded with white, suffused pale pink, and are deliciously perfumed. Vigorous. A lovely and distinct Rose of great merit.

LOS ANGELES. H.T. A 1917 Rose which is said to be one of the finest ever introduced. In color it is a luminous flame-pink, toned with coral and shaded with translucent gold at base of petals. The buds are long and pointed, expanding into enormous,

THIS SPLENDID ASSORTMENT OF 10 PLANTS FOR 10 DOLLARS.

Dwarf ornamental trees lavishly bedecked with flowers in early summer.

3 Beautiful Dwarf Flowering Trees For The Lawn

PLANTED IN A GROUP PRODUCES A CHARMING EFFECT

Purple-Leaved Plum: Small, compact-growing ornamental trees that will prove effective as a part of any planting scheme. The foliage is dark crimson, changing to purple as it matures, retaining that color until late in November.

Double-Flowering Almond: Low-growing and bushy, in early summer delighting the eye with its double white and rose-colored flowers that appear in great profusion. One of the most beautiful of the genus.

Bechtel's Double-Flowering Crab: All the Flowering Crabs are fine specimens of ornamental trees and shrubs, but this variety is the finest of the lot, forming a low, bushy tree that is sturdy, hardy, and blooms young. The flowers, wherein lies the tree's chief beauty, are double, of a delicate pink color, and delightfully fragrant; produced early in spring in such profusion that, at a distance, the tree seems literally covered with them. **These 3 for \$4.50.**

3 Delightful Hardy Vines, \$2.00

Ornamentals of this class are so hardy, so easily grown, and so beautiful that they deserve greater attention than they receive. No artist can produce pictures equal to the wealth of beauty displayed by the elegant wisteria, the graceful kudzu vine or the charming and magnificent evergreen bitter-sweet. They are indispensable for screening porches, summer houses, for covering tree trunks and trellises. Many varieties when in flower fill the summer air with their fragrance. Planted generously, they will in a year or two transform a new place. Give them a fine rich soil and they will require little attention.

Wisteria: Picturesque climber with great clusters of pale bluish violet, pea-shaped flowers that make a handsome showing when a vine has been properly trained over a porch or arbor. After becoming established, the vine makes an enormous annual growth.

Kudzu Vine: The most rapid-growing vine in cultivation, attaining, after once being established, a height of 50 feet or more in one season. Its foliage is large and furnishes dense shade; it bears small racemes of rosy-purple, pea-shaped blossoms, towards the close of August. Exceedingly valuable for covering porches, pergolas and trellises.

Evergreen Bittersweet: A beautiful, low-trailing evergreen with aerial rootlets which cling to any support. Forms a lovely decoration on walls or trees, with its masses of red berries in winter. As an evergreen, absolutely hardy wall cover, this plant is unequalled.

Great clusters of light bluish-violet pea-shaped flowers give the Wisteria a distinctive ornamental value.

Our Blue Ribbon \$2.00 Collection of Gladiolus 12 Named Varieties

Nothing will give the planter so much for the money spent, as Gladiolus.

NO. 1. EVELYN KIRTLAND. (New.) The flowers of strong substance, are a beautiful shade of rosy pink, darker at the edges, fading to shell pink at the center, with brilliant scarlet blotches on lower petals. Wide open flowers, slightly fluted and many open at a time. Very tall, straight spikes. One of the finest.

NO. 2. GRETCHEN ZANG. (New). The blossoms are large and sparkling and the most beautiful soft melting shade of pink, blending into scarlet on the lower petals. The color everyone wants. Spike tall and graceful.

NO. 3. GOLDEN WEST. A decidedly showy variety, the color being a clear rich orange-red or scarlet, with golden yellow markings on the lower petals faintly suffused with violet shadings, the only variety we know of showing real gold color. The individual flowers are of large size and stand out boldly, giving the effect of a gorgeous sunset, hence its name Golden West.

NO. 4. QUEEN OF ROCHESTER. Here is a variety that attracts a great deal of attention everywhere. It is a production direct from Holland and very uncommon in this country. The flower stalks grow medium height, very strong and stocky and produce large, wide open, bell-shaped flowers of the most beautiful rich deep rose color, with a golden yellow blotch and throat beautifully tinted. We know of no other variety of Gladiolus anywhere near like it and all who grow it have something very unique and beautiful.

NO. 5. MARY PICKFORD. An extraordinary flower and spike of a most delicate creamy white, throat finest soft yellow, white calyx and stem.

NO. 6. MRS. FRANCIS KING. One of the most popular varieties in cultivation. The spike grows very tall, frequently branched and covered with large flowers of a rich flame-red or pink with small carmine spots on the lower petals and a darker throat. It is a most beautiful variety and a very strong and rank grower under nearly all conditions.

NO. 7. EMPRESS OF INDIA. Flowers are large in size, borne on strong stiff spikes. A rare shade of rich dark brown red—the deepest of its color grown by us.

NO. 12. HERADA. (New). Another good one. Blooms of immense size on tall straight spikes. Massive in every way. The large blooms are pure mauve, glistening and clear, with deeper markings in the throat. A very striking and attractive color.

This assortment should give an abundance of bloom the first season planted. They should be seen growing to appreciate the beautiful shades and colors. Read the descriptions of each and order a supply of bulbs.

Our special price for this group of 12, all different —no two alike, \$2.00.

These bulbs can be planted in March, April, May or June, according to location and should bloom in July, August and September. Each bulb will make from one to four spikes of bloom and a dozen or more flowers on each bloom. They last a long time and keep 10 days or more as cut flowers in the house. We send out only large size blooming bulbs. You will never get a finer collection at this price. It is not necessary to write out each name separately—merely order as "Blue Ribbon Collection."

NO. 8. PEACE. A very strong healthy grower and a free bloomer. The flowers are large, pure white in color with a slight tinting on the lower petals, making it very delicate and attractive. The flowers are correctly placed on a heavy straight spike, and it is one of the best of the white varieties.

NO. 9. PRINCE OF WALES. An early flowering variety with splendid spikes of large flowers of delicate apricot-pink suffuse salmon.

NO. 10. WAR. A magnificent dark variety with tall spikes well filled with large flowers of a rich ox-blood red shaded crimson black. Flowers often measure 7 inches across. The foliage is broad and deep green. Truly a wonderful variety.

NO. 11. BLUE KING. Acknowledged to be the best blue Gladiolus. It grows a splendid, tall, well finished spike with medium sized flowers of fine shape, well set on the spike. The color is a rich, deep indigo blue, making it strikingly beautiful in combination with other varieties.

Petite Jean: Pinkish white.

Excelsior: Yellow.

White Dotte.

Hardy Chrysanthemum —Are a joy forever

Barberry Thunbergii (*Japanese Barberry*)

*Desirable as Hedge or Planted as Individual Shrubs
Around the House Foundation or in Borders*

A VERY beautiful general purpose dwarf shrub. Useful for many reasons. It grows to 3 or 4 ft. in height; is very hardy anywhere; will thrive in sun or shade. Is fine in groups or in the shrubbery and makes one of the best low hedges, either natural or formal as it will stand shearing. It is graceful in habit; has small yellow flowers in June, followed by bright scarlet berries in the fall which usually hang during the winter, giving a bit of color to the winter aspect.

The foliage is a very attractive green during the summer and the autumn colors of the leaves are among the most superb of any of the shrubs. This shrub, because of its protective thorns, furnishes favorite nesting sites for birds during the summer and its fruit furnishes them with winter food.

Prices 12-18 inch,
\$3.00 per 12; \$20.00
per 100. 18-24 inch,
\$4.50 per 12; \$35.00
per 100.

Barberry Thunbergii makes the best hedge. Set plants 1 foot apart.

Hardy Native Ferns

Nearly every home owner can find some particular spot about the grounds where ferns would make an effective setting.

FOR shady locations, no class of plants can equal the ferns. They are easily grown in ordinary soils and will thrive where it is often impossible to make flowering plants succeed. The ferns listed are dug in large clumps with one to four clusters of fronds in a clump. They may be used for massing or planting separately but give an especially fine effect planted with evergreens or Rhododendrons.

CINNAMON FERN: One of our most showy ferns. Often grows 5 ft. high—fronds deep green, sometimes 6 to 8 inches wide. Thrives in open sun or moist, shady locations. Attractive in masses under trees. 50c each; \$4.00 per 10; \$35.00 per 100.

OSTRICH FERN: Erect dark green, feathery foliage, making a most effective background for smaller ferns. The Ostrich fern grows to a height of 3 ft.—width of fronds 6 to 10 inches. Thrives in shaded nooks or open sun. Should be well manured. 50c each; \$4.00 per 10; \$35.00 per 100.

SENSITIVE FERN: A hardy native fern with broad triangular leaves reaching a height of about 1 ft. It will thrive in moist soils and open sunny locations or shaded spots. Very good for the rock garden. 50c each; \$4.00 per 10; \$35.00 per 100.

ROYAL FERN: Of the large ferns, this is one of the prettiest, growing to a height of about 3 ft. Thrives either in sun or shade, preferring a moist soil. The leaves are small and pale green, sometimes bearing panicles of flower-like fruits. 50c each; \$4.00 per 10; \$35.00 per 100.

LADY FERN: Exceedingly showy—grows 2-3 ft. high with finely cut foliage. This is one of the best for general culture succeeding in sun or shade, preferably good, rich soil or moist location. 50c each; \$4.00 per 10; \$35.00 per 100.

HAY SCENTED FERN: Another splendid variety that will grow in either sun or shade. This is a very handsome, vigorous growing species. It prefers a moist soil but will thrive in dry, sunny spots. Good for massing in open ground or under trees. 2 ft. tall. 50c each; \$4.00 per 10; \$35.00 per 100.

NO ORDERS FOR FERNS ACCEPTED AMOUNTING TO LESS THAN \$2.00.

Green Globe Artichoke (Perennial)

SIX PLANTS ENOUGH FOR A FAMILY GARDEN

Our roots are not
pot plants nor
root divisions but
are the whole root.

Easily Grown
Hardy Delicious

Artichokes are a delicious delicacy found on the menus and served at leading hotels, restaurants, dining cars, etc. They are easily grown in back yards, along fences, and in the vegetable garden, requiring very little care and attention after planting. The Green Globe Artichoke grows to a height of three to five feet with numerous branches and the roots should be set about 5 feet apart. The portion eaten is the underside of the head, before the flower opens. The whole head is removed and boiled, the leaves laid aside and the bottom eaten dipped in butter with a little pepper and salt—a luscious delicacy.

We offer extra strong roots for spring planting at **\$1.00 each, \$5.00 per six, \$8.50 per twelve, \$50.00 per hundred.**

(IMPORTANT! Do not confuse Green Globe Artichoke with the common Jerusalem Artichoke. The Jerusalem is in no sense a true Artichoke, but the tuberous root of a species of sunflower.)

Exact size of Green Globe Artichoke
